

Please go to <http://www-03.ibm.com/start> and register a profile against one of the following Requirements (**Directions to register - click employment link, Select United States in the "search jobs" drop down menu, click continue, enter the job code/number in the key words section**). If you or a colleague would like drop off a resume at any time, please use the following email address, Diversityrecruiting@us.ibm.com.

Once you're in the requirement, please pay close attention to the required items when answering the questions, as we will not be able to work with your profile if you don't comply with the basic requirements of the position. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

Position Title	Job Post	Location	Skills
Patterning Development Technician	STG-0415676	Hopewell Junction, NY	Patterning Development Technician will work on the development, implementation and control of patterning processes for the manufacture of advanced semiconductor chips
Manufacturing Engineering Technician	STG-0413893	Hopewell Junction, NY	This role is responsible for engineering activities related to developing, modifying, and supporting processes, systems, products, devices, components, or production. Involved in conducting experiments, analyzing problems and recommending solutions, as well as verifying and repeating the solution
Fab Process Engineering Technician	STG-0411090	Essex Junction, VT	People in this role analyze, design, develop, and manage the processes involved in the entire product life cycle
Equip. Maintenance Technician	STG-0408905	Essex Junction, VT	Job responsibilities include repair and maintenance of semiconductor processing equipment in a clean room environment
Product Engineering Professional	STG-0422818	Essex Junction, VT, Hopewell Junction, NY	Product Engineering Professional will support our hardware and semiconductor products, and our OEM Custom Logic/Foundry customers' products
Software Developer	STG-0422812	Hopewell Junction, NY	Entry level software engineers to develop real time software that operates IBM's 300mm semiconductor factory
Development Product Engineering Professional	STG-0422789	Essex Junction, VT, Hopewell Junction, NY	Entry-level development engineers to support our hardware and semiconductor products
Facilities Systems Engineering Professional	STG-0422754	Essex Junction, VT, Hopewell Junction, NY	As a Facilities Engineer your duties will be associated with supporting multiple high volume semiconductor fabrication plants
Supply Chain Professional	STG-0422739	Essex Junction, VT, Hopewell Junction, NY	Entry-level supply chain analysts and planners to support our hardware and semiconductor products

Business Operations Professional	STG-0422727	Essex Junction, VT, Hopewell Junction, NY	These roles are responsible to assist with the senior line managers and headquarters executive management to more efficiently run the Semiconductor Development and Manufacturing Business Unit of the IBM Corporation
Manufacturing Engineering Professional	STG-0422710	Essex Junction, VT, Hopewell Junction, NY	Available Positions: Semiconductor Process Engineers, Process Integration Engineers, Characterization/Test/Failure Analysis Engineers
Software Engineer	CHQ-0423730	New York, NY, Somers, NY, Southbury, CT	In this job role you'll use your expertise in translating IT requirements into great design, as well as development and assembly of components, coding, unit testing and documentation, to create custom information systems for our clients
300mm FAB Dev OPs Technician	STG-0404938	Hopewell Junction, NY	IBM's 300mm Semiconductor Fabricator located in East Fishkill, NY is looking for technicians to staff the 300mm FAB Dev OPs team in support of Development line operations
Project Manager - Columbia	ITD-0392340	Columbia, MO	IBM's new Columbia Delivery Center is seeking a Project Manager to manage small to medium size steady state projects for Strategic Outsourcing (SO) accounts
Tivoli Monitoring Technical Support Specialist (level 2 / 3) - Columbia	ITD-0402288	Columbia, MO	Technical Support Specialists responsible for providing support for problem, change and work tickets for client server support operations surrounding the Tivoli Monitoring infrastructure
SQL Server Support Specialist	ITD-0385633	Dubuque, IA	IT Specialists in this job role will be responsible for supporting SQL Server environments and ensuring high availability, performance, and security for the environment
MS Exchange Technical Support Specialist (Jazz)	ITD-0239625	Dubuque, IA	Troubleshooting user and client management tickets with a low complexity, and limited communication with the customer, service management, and IBM teams
IT Security Auditor	ITD-0402340	Detroit, MI	Previous IT Infrastructure / Networking Audit Experience. SOX audit/compliance experience. Understanding of common Infrastructure / Networking technologies (mainframe, Unix, AS400, Intel, desktop, and network) ITIL, COBIT, Certified Information Systems Auditor (CISA), Certified Information Systems Security professional (CISSP), Certified Information Security Manager (CISM) certifications preferred
Project Manager	GBS-0425486	Rocket Center, WV	Apply project management skills / methodologies to conduct project planning, execution, and controlling activities. Manage all delivery activities executed on the account. Develop and manage detailed project plan(s), project schedule, project estimates, resource plan, and status reports. Perform project tracking, oversight, and analysis actions

Oracle Financials Business Analyst	GBS-0398604	Washington, DC Metro Area	The analyst will drive all meetings with the customer and manage the analysis through design phases related to Oracle Federal PO (AP and GL is preferable). Specifically, analyze CMS requirements, configure Oracle PO, AP and GL modules, & prepare design alternatives & design specification documents for HIGLAS extensions & reports. Independently conduct Conference Room Pilot & be responsible for the fit gap analysis of the Oracle PO module
Oracle Financials Functional Analyst	GBS-0424502	Atlanta, GA, Raleigh, NC, Rocket Center, WV	Oracle Financials Functional Analysts will be the Oracle SMEs for a Federal Financial implementation in one or more of the following modules: PO, AP, AR and GL. Analyze requirements, prepare Fit/Gap analysis, configure Oracle modules, and design interfaces, extensions and reports. Prepare design alternatives and design specification documents. Manage the analysis through design phases related to Oracle modules. <ul style="list-style-type: none"> <input type="checkbox"/> Functional PO, AP, AR and GL Analyst <input type="checkbox"/> Functional Solution Design of PO/AP/AR/GL Gaps <input type="checkbox"/> Module Configuration of PO, AP, AR and GL
SAP Application Development - Jr	GBS-0408661	Rocket Center, WV	SAP Application Development will have experience in SAP Application Development; ABAP; BAPIs, BADIs, ALE, RFCs, IDOCS, Enhancements, Workflow, SmartForms, Web Dynpro
SAP Basis Administrator	GBS-0409523	Rocket Center, WV	Design and implement SAP environments and develop creative solutions to meet database performance; Manage and ensure availability and performance of SAP systems, including underlying databases and servers; Manage Production SAP landscapes; Lead functional teams/end users to proactively identify, resolve, and eliminate production issues and performance variances; Understand and manage disaster recovery systems using Oracle Dataguard; Evaluate and apply updates and patches, as required; Document procedures and system changes; Monitor and Tune SAP performance. Administer system and end-user security using the SAP profile configurator and related transactions, maintaining documentation and following established procedures
Systems/Product Assurance Engineering Professional – Netezza	SWG-0422233	Marlborough, MA	This role has responsibility for assuring the quality of the developed product. Responsibilities include systems bring up and integration, systems performance, hardware test, quality, RAS (reliability, availability, and serviceability), and product introduction of next generation IBM/Netezza products
Software Architect	SWG-0418642	Marlborough, MA	This role leads the effort to ensure that the IBM Netezza data warehousing appliance family continues to set the standard in the industry for data warehouse price/performance. They are responsible for ensuring the performance of one or more Netezza products from the earliest design phases through the remainder of the product life cycle, focusing on product design, workload specification, test development, measurement and performance analysis
Project Manager (Netezza)	SWG-0405594	USA	Lead the selling and delivery of SWG Brand specific service engagement. Project Managers ensure that achievable implementation expectations are set during the sales cycle with the Center of Excellence to drive the technical requirements and the Solutions Enablement team to identify opportunities to reduce overall implementation time and cost

Services Consulting Engineer – Open Pages	SWG-0423537	USA	Defining architectures, configuring software, and implementing solutions for customers deploying OpenPages software and associated applications
Hardware Storage Test Engineer	SWG-0398981	Marlborough, MA	This individual will be held accountable in understanding the life cycle and product deliverable of the area in which they work. Strong background working with storage networking technologies such as SCSI, SAS, SATA, Fibre Channel. 5-10 years experience working with storage hardware such as disk drives, storage enclosures, raid controllers, storage network switches and HBA's
Data Warehouse Solution Architect (Security Clearances)	SWG-0423890	USA	This role focuses on the elements required to manage all aspects of data and information (both structured and unstructured) from business requirements to logical and physical design. This role spans the full information management lifecycle from acquisition, through cleanse, transform, classify and storage to presentation, distribution, security, privacy and archiving.
User Experience Architect	SWG-0410449	Tucson, AZ	We are looking for an individual with a background in Human Factors or Usability who has an eye for simplistic, intuitive design and a passion for transforming complex products into world class Web UI Applications
Websphere eXtreme Scale Developer	SWG-0417555	USA	The IBM WebSphere eXtreme Scale development team is actively seeking candidates with a strong background in computer science/engineering to develop cutting edge distributed elastic caching software
Software Performance Analyst	SWG-0413061	Atlanta, GA	This role focuses on gathering performance related metrics for IBM Security Solutions products. Activities include environment build out, system and product installation, Software Requirements Document (SRD) review, development and execution of performance tests, and documentation of findings
X-Force Avanced Researcher	SWG-0408958	Atlanta, GA	We are looking for someone with solid reverse engineering skills and experience either disclosing vulnerabilities or providing signature and engineering content and feedback to development teams (preferably an Intrusion Prevention System). We will also consider candidates with malware research experience as long as they have demonstrable experience analyzing malware that leverages exploits to spread
Software Developer	SWG-0412305	Las Vegas, NV	Java Developer - Primary Responsibilities include: Design and develop multi-tierd, object oriented (OO) web applications; Develop high quality Java components, JSP/HTML/JavaScript pages; Debug and maintain existing code base
SaaS Storage Support Specialist	SWG-0422543	Austin, TX	Managing and maintaining a Storage Environment (SAN); Assist with daily backup operations including configuration and maintenance as well as configuring, scheduling backups, vaulting/offsite tape management. Strong knowledge of Solaris/Unix/Linux and be comfortable working in a Shell environment

SaaS Security Architect	SWG-0390848	Austin, TX	The Security Architect role focuses on the design of business-driven Information Technology solutions to meet security requirements related to function, protection, assurance, risk management and compliance
Senior Test Automation Specialist	GBS-0416381	Washington, DC Metro Area	Planning, design, management, execution and reporting of tests - using appropriate testing tools and techniques - to ensure that IBM systems (new and amended) conform to exacting standards
O&M Test Lead	GBS-0414219	Washington, DC Metro Area	As a Test Specialist, you'll use your expertise in the planning, design, management, execution and reporting of tests - using appropriate testing tools and techniques - to ensure that IBM systems (new and amended) conform to exacting standards
Security Compliance Analyst	GBS-0424714	Tampa, FL	The Security Compliance Analyst supports physical and Information assurance and security for the program. The Security Compliance Analyst supports IT security requirements and infrastructure, contributes to data security & privacy issues, supports all phases of information system Certification and Accreditation activities.
Risk Manager	GBS-0424235	Tampa, FL	Provide risk management support. Provide support to technical and functional experts. Analyze program requirements, actions, and decisions from a systems engineering, cost, and scheduling perspective to determine associated risks. Develop risk mitigation plans and implement required actions.
Enterprise Relationship Manager	GBS-0424703	Tampa, FL	The Enterprise Relationship Manager will orchestrate and oversee technical reviews, product research, and cost analysis of IT products, services, concepts, and ideas as directed and recommend technical solutions that improve integrated IT efficiencies and performance.
Enterprise Architect	GBS-0416997	Tampa, FL	Provide Enterprise Architecture Support to the CIO/J6 at SOCOM SITEC. Monitor adherence to DoD policies. Create DoDAF architecture materials for CIO/J6. Advise SOCOM ITMO on policies, procedures, tools, and methods required to adhere to DoD guidelines
C4i Production Services Lead	GBS-0389495	Tampa, FL	Responsible for all aspects of C4I Production Services, including development and production of IT hardware and software solutions required to support unique mission needs, provides a single point of contact for this service area. Support and enhance the ITMO service management capabilities and help the ITMO coordinate, integrate, and synchronize the capabilities and services of best-of-breed C4I Production Services staff.
